BRIEF INTRODUCTION

Guangdong He Fa Steel Towers Co., Ltd. of Nanhai District, Foshan City, Guangdong Province is in the hinterland of Pearl River Delta, located near the beautiful South China Peach Blossoms Resort-----Gui He Road, next to Guang-san, Guang-fo and Fo-kai three express ways. The well-known China Central T.V. Station Nanhai Movie City is also nearby. Our Co. is only 10 Km away from Guangzhou City, 20 Km from Guang-Zhou new Baiyun International Airport, 15 Km west from Foshan City. Our Co. is situated at a very good location with convenient communications and transportation.

Guangdong He Fa Steel Towers Co., Ltd. is a big enterprise specialized in making various transmission line steel towers, telecom towers and steel structure with a professional and experienced team of 600 staffs including 30 middle and senior management staffs, 50 middle and senior engineers, 80 engineers technicians, 40 quality management and product inspectors and more than 400 skillful workers who are solid support for the development of the enterprise.

Currently, the main products of the company are: 750kV and lower transmission line angle steel and steel tuber towers, cross-arm of concrete pole, transformer substation structure, steel structure, microwave and telecom steel towers, non standard metal tools, hot-dip galvanizing bolts, vacuum sheradizing bolts, and with the business covering hot-dip galvanizing and vacuum sheradizing steel structure.

Insisting on the development strategy or professional and dedication with steady accumulation, after constant development, currently, “He Fa” company occupies an area of nearly 80000 square meters, with more than 300 sets of production equipments. It has equipped 15 angle steel and plate automatic production line, and has introduced Italy “FICEP” CNC angle steel production line, CNC plate high speed drilling line. In addition, the company has equipped 24m steel plate CNC cutting line, pipe line automatic arc welding machines. Company has 7000 square meters of trial- assembly site, and 2 galvanizing product lines applying effective and environment protective electric heating technology and automatic monitoring technology, as well as environment protective dust collection equipment imported from Germany, and recyclable zero discharge waste water treatment stations.
